THEOPHILUS AH-HING

ELECTRICAL & ELECTRONICS ENGINEER

I am passionate about embedded systems and automatic control, aiming to specialize in these areas. I am eager to deepen my knowledge of LV/HV electrical systems and installations to enhance my design and troubleshooting skills. My goal is to develop a well-rounded expertise in electrical engineering, with a focus on embedded and control systems.

CORE KNOWLEDGE AND SOFTWARE PROFICIENCIES

- Siemens TIA Portal & TXP
- Schneider Ecostruxure
- VHDL
- Visio
- Python
- Java
- MATLAB
- RStudio
- SQL
- C, C++, and C#
- GitHub (Version Control)
- Altium Designer
- HTML, CSS, and JavaScript
- Linux – Kali & Ubuntu
- AutoCAD
- SAP & TRIM (HPE Records Management)

Email: theo.ahhing@outlook.com
Address: 24 Longridge St, MacGregor QLD 4109

QUALIFICATIONS

2023 – Present
Bachelor of Electrical & Electronics Engineering with Honors & Minor in Software

2025 – Present
Certificate in Confine Space

2025 – Present
Certificate in Working at Heights

2023 – Present
Certificate in S1/S2/S3 Supervisor

2025 – Present
Certificate in First Aid and LVR

2014 – Present
Certificate II in Retail

2023 – Present
White Card

EXPERIENCE

Embedded Engineer (Work Experience)

Microelectronic Systems | Jan 2020 – April 2020

- Developing front-end and back-end code.
- Designing user interfaces.
- Supporting senior engineers with selecting PCB components.
- Documenting design choices and code functionality.
- Providing system and codebase interoperability.

Electrical Project Engineer

CS Energy | June 2023 – Jan 2025

- Constructing and maintaining temporary facilities to accommodate 300+ individuals in accordance with NCC and Australian Standards.
- Providing management support for major projects while overseeing minor projects.
- Managing electrical, civil, and mechanical contractors and coordinating with fire subcontractors.
- Developing progress reports, maintenance procedures, risk assessments, cable schedules, electrical drawings, and ITPs.
- Reviewing As-Built drawings, MDRs, ITRs, and safety documents (JSA/SWMS).
- Acting as Officer-in-Charge (OIC)/Permit Holder, responsible for checking isolations, conducting pre-starts, and supervising work parties in accordance with the PTW system.
- Resolving engineering and technical issues on-site.
- Providing power calculations and sizing cables, circuit breakers, and fuses.
- Commissioning and testing ACBs, LV switchgear, electrical motors, sensory equipment, and control gear.

Control Systems Engineer

CS Energy | Jan 2025 – Feb 2026

- Developing and Reviewing design briefs, reports, procedures, risk assessments, cable schedules, drawings, safety documents, and ITPs.
- Providing support (management, engineering/technical, and training) to operators, engineers, and contractors.
- Implement logic modifications and technical issues on-site.
- Commissioning and testing sensory equipment, control gear, and IT & OT infrastructure.
